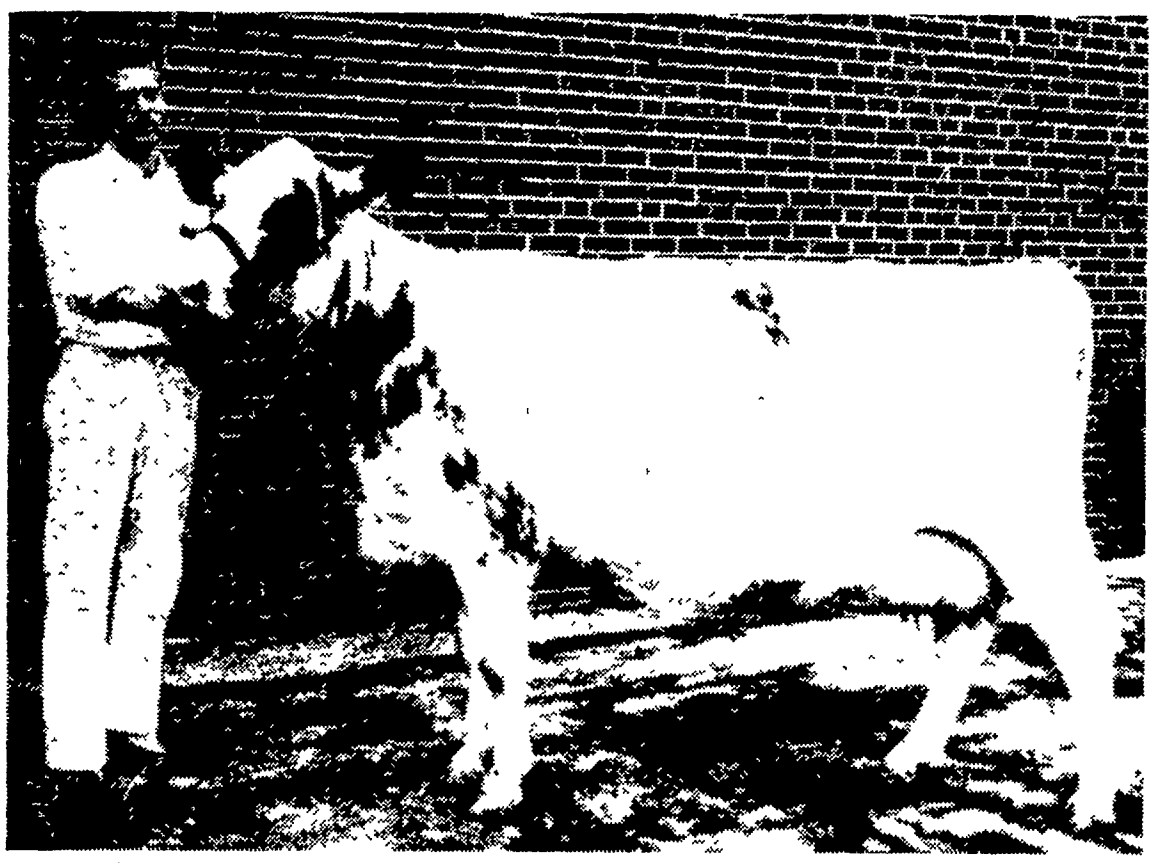
Lancaster Farming

VOL. 8 NO. 6 | Lancaster Farming, Saturday, January 12, 1963 | $2 Per Year



GRAND CHAMPION OF BOTH 4-H and open class Ayrshire judging at the Pennsylvania Farm Show was Glenhurst Dixie Pretty, shown here by R. Edwin Harnish, Christiana R1. "Pretty" was Farm Show grand champion in 1960 and reserve grand champion in 1961. In addition, she has won 25 grand championships in local farm shows and fairs. Until last year when she had foot trouble, "Pretty" had never been defeated in class competition. L. F. Photo.

Co. Farm Show Exhibitors Bring Home Many Trophies

Championships in 4-H Hereford and Shorthorn steer classes, and grand championships in Ayrshire, Spotted Poland Chinas, and 4-H lamb and wether classes kept plenty of purple ribbons flowing toward Lancaster County from the Pennsylvania State Farm Show this week

Many other first place and lower place ribbons in class competition came to Garden Spot exhibitors from the giant agricultural exposition in Harrisburg

Lancaster County entries completely dominated the state tobacco show No other county in the state appeared in the awards lists

Largest winner in the dairy cattle judging was R Edwin Harnish, son of Mr and Mrs Ralph E Harnish Christiana R1, who exhibited two Ayrshire females, a mother-daughter combination, to the grand championship of the open, 4-H and FFA classes.

The cow, Glenhurst Dixie Pretty, won her second grand championship banner at the show In 1960 she beat out all competition for the coveted banner, but finished in the reserve champion spot at the 1961 exposition Last year, because of foot trouble, she stood third in her class "Pretty" due on January 15 with her fourth calf, showed dry, an unusual condition for a grand champion Her daughter, a junior calf, was the grand champion FFA Ayrshire

In the 4-H steer competition, Donna Hess, the 11 year old daughter of Mr. and Mrs Elvin Hess Jr. Strasburg R1, took th top spot in the shorthorn classes while Willis Hackman, Elizabethtown R3,

Harold Brubaker Is Honored By State Holstein Association

A Lancaster County Boy has been named Pennsylvania Holstein Boy of the year by the Holstein-Friesian Breeders Association

Harold Brubaker, Mount Joy R1, was the second Lancaster Countian to be honored in as many years by the state group Last year the award went to Donald Trimble, Quarryville R1.

Brubaker, a junior in vocational agriculture at Donegal High School had a herd of 12 purebred Holstein cows and is following a "Lucifer" line breeding program.

On a trip to Waterloo, Iowa, last fall as a member of the state FFA dairy cattle judging team, Brubaker purchased two registered Brown Swiss cows from the herd of Dr John McKitrick He won a blue ribbon in national competition on the tour as well

HAROLD BRUBAKER

Brubaker attended the national FFA convention of Future Farmers of America last fall in Kansas City He is engaged in farming on partnership basis with his father, Paul Brubaker, on the home farm.

The award was made at the annual banquet of the state Holstein-Friesian Association held this week in Harrisburg in conjunction with the State Farm Show.

Young Farmers Schedule Meets In 3 Schools

Three chapters of Young Farmers Association (YFA) will meet next week in as many Lancaster County High Schools

Young Farmer Associations, organized under the vocational agriculture programs in county high schools conduct regular classes in agriculture under the direction of teachers of vocational agriculture

As the name implies, the classes are made up mostly of young farmers, but the teachers say, "A young farmer is

Rohrer Witmer Reelected By Guernsey Men

Rohrer Witmer, Willow St R2, was re-elected a director in the state Guernsey Breeders Association at their annual meeting this week in Harrisburg

Meeting in conjunction with the Pennsylvania Farm Show, the association re-elected all other officers and directors They are president, Leroy Campbell, Grove City, Mercer Co, vice president, Thomas Carman, Glen Rock, York Co, secretary-treasurer, John Wolford, North Wales, Montgomery Co and directors, (in addition to Witmer) Clarence Hack, Berwick, Columbia Co; George Newlin, Chadds Ford, Chester Co. and Jacob Smith, Annville, Lebanon Co.

The Rev. James Singer To Speak At Red Rose DHIA Banquet

The Reverend James M Singer, Pastor of the St Matthew Lutheran Church, Bloomsburg, will be guest speaker at the annual banquet and

REV. JAMES SINGER

meeting of the Red Rose Dairy Herd Improvement Association next week

The meeting is scheduled to take place at noon on January 15 in the Host Motel, Lititz Pike and Keller Ave., Lancaster

The Reverend Mr Singer was born in Manheim His early Christian education was obtained in Zion Lutheran Church Manheim Upon graduation from high school, he entered Gettysburg College and was graduated in 1945.

While in seminary, he served two years as instructor in English Bible at Gettysburg College He served as pastor of the Luther Place Memorial Church, Washington D. C. from February 1948 to July 1949 when he accepted a call to be Pastor of the Christ Second Lutheran Church, Altoona. He began his duties in his present charge in January 1954

(Continued on Page 10)

Tractor Clubs To Organize

Two county 4-H Tractor maintenance clubs will be organized next week, according to Winthrop Merriam, associate county agent

Any young person interested in farm machinery and tractor maintenance and safety is invited to take part, Merriam said. The courses will be conducted by well qualified 4-H leaders in the

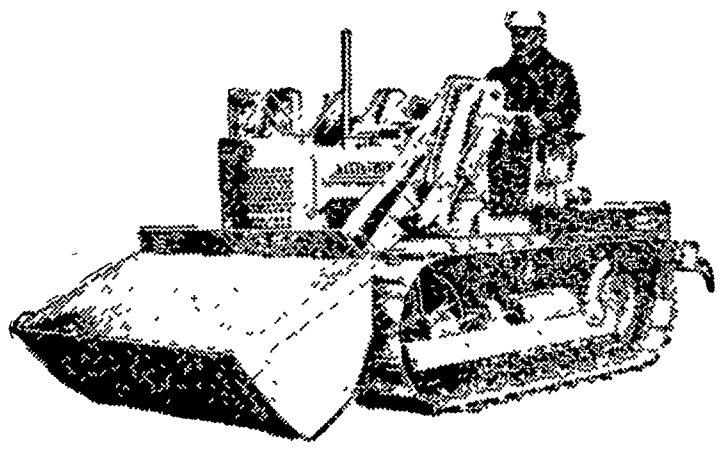
TREND Market firmer under more lively buying interest, but except in a few instances, supplies are adequate for expanding demand

Copyrighted 1962 By Urner-Barry Co.

The average American consumes 15 pounds of meat, 108 pounds of potatoes, 16½ pounds of coffee, gives $41 90 to the church, buys $11 20 worth of stamps and receives 305 pieces of mail per year — and pays $1,667 00 in taxes.

SHUTTLE CLUTCH MAGIC MEANS EXTRA PROFIT!



Watch this Allis-Chalmers crawler and ⅞-yard loader move in fast, pick up a big bite of material, and move out fast to load the truck, cutting seconds from every work cycle.

SHUTTLE clutch magic lets you reverse direction without foot clutching or gear shifting. You simply move a lever forward and back. And the SHUTTLE clutch is just one of the many benefits that make the H-3 and HD-3 the most profitable compact crawlers in the 6,000-lb class.

You also get independent control of steering clutches and brakes; "live" hydraulic systems; box-type, all-steel main frame; long, rugged track assembly; and gasoline or diesel power. Let us give you the facts!

From Where We Stand . . .

Incentives To Do Bet ter Work

Have you ever seen the sport of dog racing?

If you have, you've noticed that the dogs don't do much running until the rabbit is turned loose.

In the case of the greyhounds, it is just a mechanical rabbit, but at least there is an incentive for them to run. Without the rabbit it probably wouldn't be much of a race.

Many farmers have found it is profitable to place a "rabbit" in the form of incentive payments in front of their farm workers.

Incentive payments in many cases encourage employees to work harder and do a better job As a reward they receive extra benefits — usually in the form of dollars Although at first glance this appears to be a very expensive way to pay farm workers, usually the incentive payments are earned by the workers through increased productivity, better quality work, or lower production costs.

Incentives are a way of rewarding workers for superior performance — performance beyond the expectations of normal day labor

But unlike the rabbit in the dog race, the incentives should be within the reach of the person who will reach for them. Also unlike the dog race, incentive payments are not always easy to manage. Often they create as many problems as they solve. Finding performance standards that are above the average but not out of reach may be difficult to establish.

It is a good idea to make the incentive payments separate from the usual wages so the worker won't confuse them with his pay. Spreading the payment out over the year is usually more desirable than making payments in one lump at the end of the year or the harvest season.

Usually, incentives based on added output are better than those based on net income because of the difficulty of arriving at a net income figure that is suitable to both parties.

While such payments are often made in cash, they can also be made in the form of livestock, crops, paid vacations, or other substitutes. The form of payment can usually be worked out to the satisfaction of all concerned.

Incentive payments are by no means a cure-all for the farm labor problem. While many plans have met with marked success for both farmer and worker, others have been dismal failures.

If the plan is properly set up, however, and carefully worked out and understood by both parties, incentive payments can be successful. If the hired man understands and appreciates the opportunity to improve his income by putting forth a little extra effort or assuming added responsibility, and the farmer sees the expenditure of the extra cash as an investment toward more efficient production, a happy arrangement is possible.

While not the complete answer, incentive payments do provide a way of getting and keeping good hired help, plus giving the farmer added return for his investment in farm labor.

We believe good hired labor is one of the most precious commodities on the farm today If incentive payments help you keep your good workers, we believe you can well afford to make them attractive.

At least that's how it looks from where we stand

Farm Safety

The number of farm-accident fatalities is not declining in proportion to the decline in farm population, according to a report issued recently by the U S. Department of Agriculture.

One reason for the continuing high death rate in farm accidents is the increasing average age of people on farms. Another reason is the increased amount of powerful machinery and the absence of any organized supervision of the operators of the machines.

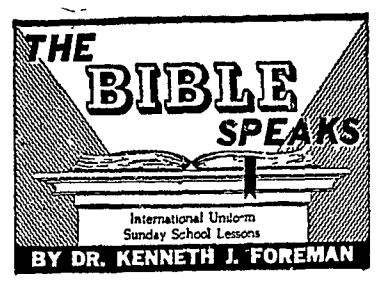
Rural traffic is usually less well controlled than the traffic in urban areas. Furthermore, with farms more isolated, the opportunity for the injured to receive first aid promptly is less abundant.

While falls are by far the most numerous causes of farm accidents, injuries on farm lands are usually associated with the use of machinery.

While many of the accidents to farm residents result in death, many are nonfatal. Researchers found last year that nearly one third of all farm workers in the United States were injured in some sort of accident. About 19 per cent of the farm population was injured seriously enough to lose time from their work, and about three per cent are disabled permanently each year.

We believe it is not too early in the new year for all farmers to begin a systematic, organized campaign to make all members of the farm family recognize the value of working safely. A hit-or-miss safety program is not enough. Safety on the farm is a full-time, all-year job for everyone.

At least that's how it looks from where we stand.



Bible Material: Mark 1 14-45
Devotional Reading: Philippians 2.1-11.

Jesus Beginning

Lesson for January 13, 1963

JESUS of Nazareth always had grumblers or complainers in his audience. They could always find fault—though that was no discredit to him. God on high has many self-appointed critics, but he was never known to change his way on their account.

Dr. Foreman

One can easily imagine what some of Jesus' listeners might have said when Jesus preached his first sermons. Neither Matthew nor Mark gives us a whole sermon, only a sketch of his general line. The reader who will compare Matthew 3 2 with Matt 4 17 can guess what the unfriendly listener might say. 'There's nothing new here, I've heard this before" Word for word, the report of what John preached is just what Jesus preached The Master added something, but it did not change the fact that—at first—what Jesus Jesus preached was so much like what John preached that you might be tempted to call it an echo.

Carrying On

Mark connects Jesus' beginning to preach with the arrest of John the Baptist. As long as John was preaching, Jesus remained in silence. When John's brave voice was shut into the dungeon of Herod's castle, then Jesus came into Galilee and preached. It should not surprise us that Jesus had a message so much the same as John's. It was not that Jesus was an echo or that he had no mind of his own. Rather, he evidently felt that what John had proclaimed still needed saying It was of the utmost importance that as many as possible should hear the news, should be faced with the demand. The Kingdom of God is at hand! Repent! Believe! This was no light matter Human destinies depended on whether people were ready for the Kingdom, whether their wills and purposes were attuned to God s.

Prayer and Planning

Jesus did not spend all his time preaching. When a woodsman has a hard day ahead of him, he does not rush out and start chopping. He spends some time in sharpening his axe.

So it was with Jesus. One of the first things we hear of his doing, was to call certain fishermen to be his followers. Some people think that the little scene by the lakeside, pictured in few words by Mark, was the whole story: Jesus just walked up to four total strangers and said, "Follow me." Other Bible students see this incident as part of a longer story, most of it untold, of gradual acquaintance, climaxing in this definite "call" However that may be, it is clear that Jesus was already planning ahead for the days when he would no longer be on this earth as he then was. To put it in one word, he was thinking ahead to the church If the life of Jesus in Chapter One in the great story of Christianity, the rest of the chapters are the life and adventures of the Church. Jesus was already thinking into the distant future, when he began to choose his Twelve.

Before everything else

Mark first mentions Jesus' prayers after all the healings at Capernaum, after the calling of some of his disciples and the casting out of a demon in the synagogue. But it is likely that Jesus would have put off praying till then? Mark, the shortest of the Gospels, does not try to tell us everything —and neither did the other three gospel-writers. Luke tells us that Jesus was praying at the time of his baptism; and we may be sure that that was not the first time. Along with planning, ahead of planning, goes prayer. Knowing what we do about Jesus, we can be sure he did not just make his plans first and then ask his Father to approve. The best planning is that which takes God in—not as a postscript, a formal last minute unnecessary bit of religious courtesy. The best planning is that which consults with God first, makes the plan step by step with prayerful listening to hear God's whisper. If Jesus found it so important to pray that he would rise before dawn to find time for it, surely the ordinary Christian needs to pray even more. For prayer is not only telling God what we want —he knows that already. It is listening for him to tell us what **He** wants.

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

To Buy Certified Seeds

One of the best ways of actually getting what you really want is to plant certified seed In order to have some assurance of good germination, free from weeds, and the best yield ability of certain varieties, it is strongly recommended that the best seeds be used. In most cases with the buying of seeds, you get in proportion to what you pay.

To Cut Down On Feed Waste

In many cases of livestock feeding where the self feeders are used, there is too much waste of valuable feed In some research studies with hog feeding it was found that many feeding operations lost from 3 to 7 percent of the feed. This is not the way to make a net return on any feeding operation. Feed is expensive and one of the objectives should be to get a good feed conversion into meat or milk Local feeders are urged to inspect their feed operations in order to reduce the waste of feed.

To Prevent Wool Blindness

Experienced shepherds will trim the wool from around the eyes of their sheep at this time of the year This is quite often necessary in some breeds such as Shropshires or Southdowns where there is a lot of wool about the head. In other breed such as Cheviots and Suffolks this will not be necessary. If the wool has grown tight around the eye opening, it is very difficult for the sheep to see where to go and to see feed and water. Some attention in these cases will produce more profit from the flock.

To Prevent Snow Mold In Lawns

Snow mold is a fungus that thrives under conditions found under snow cover. Mold appears in gray or dirty white patches a few inches to a foot or more in diameter after the snow melts This condition may be prevented by spraying with chemicals containing calomel, corrosive sublimate, or thiram-mercury compounds; the rate is 3 ounces in 3 to 5 gallons of water per 1000 square feet of lawn between snow covers.

Neighbors Aid Family Who Suffered Fire Loss

The traditional bountiful neighborliness of the people of Lancaster County went into full play this week to aid a family who lost all its possessions in a fire.

The family is that of Mr. and Mrs Clarence Frankford. at Poplar Grove, Lititz R2, whose home was destroyed by fire last Sunday evening, leaving seven people homeless and causing more than $9000 loss

Within hours a vacant dwelling in Brickerville was made available to the family by its owner, Homer Kleinfelter, of near Brickerville.

Immediately the Brickerville Fire Comany, of which Charles L. Adams is fire chief, began collecting furniture and clothing for the family, and within a short time the work was taken over by Steigel Lions club of Brickerville, which has assisted many families in the past who have been burned out of their homes.

Offers of supplies from people over a wide area of the northern part of the county, and the Lancaster Water Street Mission also offered aid Within a couple of days the family had received a stove, refrigerator, living room furnitue, complete bedroom sets, rugs, two breakfast sets, silverware and dishes.

● Farm Show

(Continued from Page 1)

accomplished the same feat in Herefords

Fred Hess, Bareville R1, showed the champion 4-H lamb, while Kenneth Hess, a brother of Donna, exhibited the champion trio Miss Averill Royer, 20-25 Oregon Pike, had the champion carcass lamb, and Dennis Sangrey, Conestoga R2, had the top wether

Warren C Leininger, Denver R2, took another grand championship with his Spotted Poland China Senior Spring Gilt

Martin Wenrich, Denver R2, repeated as champion of the FFA Hampshire swine exhibitor.

Paul Trimble, Quarryville R1, made Farm Show history with his sixth championship in the southeast 4-H corn competition The win was the fifth consecutive win for Paul in the 15-county competition Wilmer Esbenshade, New Holland R1, won the corresponding title in Future Farmers of America competition

In open class corn competition, David M Landis Lancaster R6, won his second consecutive title in both the 30-ear and 10-ear classes for open pollinated or flint corn John W Eby, Gordonville won top prize in the 10-ear exhibit of single cross hybrid corn

In his first year of competition at the show, Leroy Zimmerman, East Earl R1, won every championship award the Farm Show offers in turkey competition Harry Lamparter, Mountville, showed the reserve champion dressed turkey

Galen Crouse, Stevens R1 dairyman won the reserve championship in the state hay show with a sample of heat cured alfalfa

Nine first place ribbons in vegetable, classes were won by Daniel Brubaker, Ephrata R1

Three first place awards in the Suffolk sheep division went to Mrs Milton K Morgan 1916 New Holland Pike

A total of 16 first place awards in home economics classes were won by county homemakers

County Farm Show results in the agriculture classes will be found on this page

Get up to a TON more milk per cow...

with PURINA COW CHOW D

America's dairy cows are producing more milk than ever before. And a Purina milking ration, Cow Chow D, is helping many of them make up to a ton more.

Balance of quality ingredients is the secret behind the high efficiency of Purina Cow Chow D.

Purina's Research herd of Holsteins and Guernseys has been giving nutritionists factual information on Purina Dairy Rations for over 30 years. This milking string proved the value of Cow Chow D by producing an average of 2067 pounds more milk per cow over that produced on a regular 16% milking ration.

Put Purina Research to work on your farm by feeding Cow Chow D. Chances are, like other Northeastern dairymen, you'll find this ration will help your cows make more milk . . . and more profit.

Do You Know . . . Sows Produce 100 Gallons Of Milk Each Year

A brood sow is a factory — a "pig factory" — and she needs help to produce to capacity.

At the Purina Research Farm on the Purina Hog Program, sows each year produce more than 100 gallons of milk; wean 18 pigs; and maintain their own bodies. These are mighty big jobs.

Purina Sow Chow — fed with your grain — is designed and researched especially for these big jobs. Get Sow Chow at our store with the Checkerboard Sign.

CUT CRD IN DAY-OLD CHICKS

Now . . . you can help knock out costly CRD infection in day-old chicks with Purina Tylan Soluble. Tylan Soluble contains tylosin, a new, fast-acting antibiotic that cuts down the most common cause of CRD in baby chicks.

When your chicks first arrive, add this powerful Health Aid to their drinking water. We can supply you with Purina Tylan Soluble in economical 100-gram or 2-gram packets.

Knock out CRD with new Purina Tylan Soluble in chick drinking water.

Banana Bonanza

By Mrs. Richard C. Spence

There used to be a bugaboo that bananas were hard to digest Now doctors prescribe ripe bananas as one of baby's first solid foods — because they are so easily digested. Then along came another bugaboo — that bananas were fattening Actually, a banana has only 88 calories.

Bananas contain almost no fat — less than 2/10 of 1%. Yet — unlike so many "diet" foods — they really satisfy your appetite. Beside that, they also give you a well-rounded supply of the vitamins and minerals you need for youthful vitality.

Bananas are more than just "digestible," too Their smooth, bland texture and unique composition actually aid your digestion.

And bananas are such a blessing for people on low-sodium diets! Their delicious, natural flavor needs no embellishment — and the sodium content of a medium-sized banana is well under 0 5 mg.

What about cholesterol? There's no cholesterol at all in bananas.

BANANA FACTS: When green tipped, bananas should be cooked. When golden yellow, they are ripe for eating out of hand or cooking When flecked with brown, they are fully ripe and suitable for every use, perfect for infant feeding, ideal for blending into cakes, cookies, breads or milkshakes.

Bananas are best bought in the stage of ripeness you find them in the store Then allow them to ripen completely at home at comfortable room temperature, about 70 degrees F. And remember, bananas are available the year 'round.

Bananas should not be placed in the refrigerator except to delay over-ripening after they are already fully ripe. Temperatures below 50 degrees F. retard ripening and impair the delicate flavor. If bananas have ripened to the degree you like them their usefulness may be extended for several days if placed in the refrigerator. The hydrator or vegetable compartment is best. A peel discoloration may appear after removal but the pulp will be flavorful.

The scars or blemishes which frequently appear on the peel of the banana in addition to the familiar brown flecks do not usually affect the eating quality of the fruit in any way. These scars or blemishes rarely go all the way through the peel.

It is not necessary to remove or scrape off the "strings" that sometimes cling to the pulp of the bananas. These "strings" are edible, but not as fine in texture as the pulp.

To keep sliced bananas from darkening when they must stand before serving, either dip the banana slices into or sprinkle them with canned pineapple juice, or fresh, canned or frozen orange, grapefruit, lemon or lime juice.

* * * *

Bananas add extra nourishment and satisfying flavor to salads and salad dressings.

SPRINGTIME SALAD

- 1 package lime-flavored gelatin
- 1 package lemon-flavored gelatin
- 1 cup chicory, cut into 2-inch pieces
- ¼ teaspoon dry mustard
- ¼ teaspoon pepper
- ¼ teaspoon salt
- ¼ cup finely diced onion
- ¼ cup thinly sliced radish
- 2 ripe bananas

Combine lemon and lime gelatins and dissolve according to package directions. Pour enough gelatin into a ring mold to make a thin layer and place in refrigerator to set Place remaining gelatin in refrigerator and chill until slightly thickened or of a soupy consistency. Add dry mustard, pepper and salt to chicory, toss well, mix in onion, radish and one peeled, sliced banana, fold into soupy gelatin.

Peel and slice second banana and arrange rounds on top of firm gelatin. Pour gelatin-vegetable mixture over banana layer in mold, being careful that all of the ingredients are well covered with gelatin. Chill until firm (3 to 4 hours). Unmold and serve with tangy dressing. Makes 6 to 8 servings.

* * * *

QUICK DRESSING

Combine ⅓ cup mayonnaise, 1 mashed ripe banana, ½ teaspoon salt and 1 tablespoon milk in mixing bowl Stir until well blended. Makes about ¾ cup.

* * * *

FRUITED HAM SCALLOP

- 2 cups applesauce
- ¼ cup firmly packed brown sugar
- ½ teaspoon nutmeg
- 4 firm bananas
- 1¼ pound ham slice

Combine applesauce, sugar and nutmeg. Peel bananas and cut in half lengthwise. Arrange in casserole alternate layers of applesauce mixture and banana halves Score edges of ham slice; place on top of fruit Bake 40 to 45 minutes or until ham is tender in a 350 degree oven. To serve: Cut ham into individual portions and spoon fruit over the top of each. Makes 4 to 6 servings.

* * * *

SWEET POTATO SURPRISE

- 2 pounds sweet potatoes
- 1 tablespoon butter or margarine
- 1 teaspoon salt
- ⅛ teaspoon pepper
- ¼ teaspoon grated orange rind
- ¼ cup sugar
- 1 egg, beaten
- 2 bananas
- 2 cups crushed ginger-snap cookies

Cook sweet potatoes, peel and mash. Add butter, salt, pepper, orange rind, sugar and egg, mix well Cut bananas into 2-inch pieces Form mixture into 8 balls, with banana piece in center of each. Roll

(Continued from Page 8)

and completely coat sweet potato-banana mound with crushed gingersnaps. Place on baking sheet and heat 12 to 15 minutes in a 375 degree oven. Makes 8 servings

* * * *

PIQUANT PARFAIT

- 1 egg yolk
- 2 tablespoons lemon juice
- ½ teaspoon grated lemon rind
- ¼ cup sugar
- ½ teaspoon ground mace
- 1 egg white
- ½ cup heavy cream, whipped
- 2 bananas

Beat egg yolk, lemon juice and rind until slightly thickened. Add 2 tablespoons of sugar and mix well Cook over low heat until mixture thickens, 3 to 4 minutes, stirring constantly Stir in mace and cool Beat egg white to soft peaks Gradually add remaining 2 tablespoons of sugar and beat until stiff peaks form, fold into cooled mixture. Fold in whipped cream. Fill dessert dishes with alternate layers of fluff and sliced bananas. Garnish with sliced bananas and a sprinkle of ground mace. Chill until serving time. Makes 6 servings.

* * * *

BANANA QUICK BREAD

- ⅓ cup shortening
- ⅔ cup sugar
- 2 eggs, slightly beaten
- 1¾ cups sifted all-purpose flour
- 2¾ teaspoons double-acting baking powder
- ½ teaspoon salt
- 1 cup mashed ripe bananas

Preheat oven to 350 degrees Beat shortening until creamy and glossy, or 2 minutes at medium speed on electric mixer Gradually add sugar, beating until light and fluffy after each addition Add eggs and beat until thick and pale lemon in color

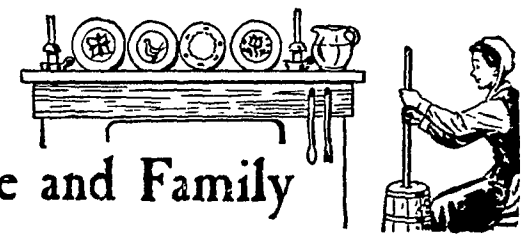
Sift dry ingredients; add alternately with bananas, blend thoroughly after each addition. Grease bottom only of a loaf pan (4½x8 - ½x3 inches). Turn batter into pan Bake 60 to 70 minutes or until cake tester inserted in center comes out clean and dry. Let bread partially cool in pan (20 to 30 minutes) before turning onto rack Makes 1 loaf

* * *

BANANA OATMEAL COOKIES

- 1½ cups sifted all-purpose flour
- 1 cup sugar
- ½ teaspoon baking soda
- 1 teaspoon salt
- ¼ teaspoon nutmeg
- ¾ teaspoon cinnamon
- ¾ cup shortening
- 1 egg, well beaten
- 1 cup mashed ripe bananas
- 1¾ cups rolled oats, uncooked
- ½ cup chopped nuts

Preheat oven to 400 degrees. Sift into mixing bowl, flour, sugar, soda, salt, nutmeg and cinnamon. Cut in shortening Add egg, bananas, rolled oats and nuts Beat until thoroughly blended Drop by teaspoonfuls, about 1½ inches apart, onto ungreased cookie sheet Bake about 15 minutes, or until edges are browned Remove from pan immediately and cool on rack Makes about 3½ dozen cookies.



For the Farm Wife and Family

Ladies, Have You Heard? . . .

By: Jane Thurston, Extension Home Economist

About Dishwashers

THURSTON

Automatic dishwashers have either a top or a front opening The top opening models come in two types — they are either a hinged or a drawer type The hinged model doesn't fit into a continuous counter top and you can't use the top as a counter The top opening drawer type fits into your counter and you can use the top.

Front opening models have doors which pull down . . . these models fit under the counter so the top is useable work space

Dishwashers come in four cabinet types The free-standing cabinet permits flexibility of installation. You can put it where you choose.

The second type — the under-counter dishwasher fits under continuous counter top gives a smooth appearance, and leaves no cracks to clean Special front panels are available to match or harmonize with your kitchen cabinets.

The stack-on model is stacked on a cabinet base, and permits ease of loading and unloading at waist level

The fourth type is the portable free-standing cabinet on free-rolling casters Portable dishwashers require no installation, and families living in rented houses or where plumbing is old or hard to change prefer this type Hoses must be connected and disconnected each time the washer is used, but most of the models can become permanent installations anytime you choose

To Bargain Or Not To Bargain

Clothing on sale or a bargain item can be a real clothing stretcher But it's a bargain only if it will serve the purpose and wear as you expect it to, if it will fit into your clothing plan, and fall within your clothing budget. You can't afford to make mistakes When you buy what you don't need, what's going out of style, fad items, or low-quality merchandise you may not be getting a bargain.

Farm Women 6 Make Dressings

Society of Farm Women 6 met recently at the home of Mrs Daniel Eshelman, 855 N. Hanover Street, Elizabethtown Co-Hostesses were Mrs. Sarah Holsberg and Mrs Laura Snyder.

Miss Lelia Coble conducted devotions and a talk was given by Mrs. Richard Andrews.

The group decided to continue serving dinners at the Wyeth Laboratories, Marietta, during the year

Members of the society will meet Monday evening, January 21, at the home of Mrs Milton Eberly, Elizabethtown R3, to make cancer dressings.

Farm Women 20 Hold Dinner

Society number 20 of Lancaster County Farm Women conducted a progressive dinner recently for their members and husbands.

Mrs Silas Rice, Kirkwood, was hostess for the appetizer with Mrs. William Gross, Kirkwood, co-hostess.

Mrs Burton Gallimore, Oxford RD, was hostess and Mrs. Hayes Hastings, Kirkwood R1 co-hostess for the salad course The main course of the meal was served at the home of Mrs Dale Miller, Oxford RD. Mrs. Thomas Ferguson and Mrs Elam Hess were hostesses for the dessert, which also was served at Mrs Miller's home The event is an annual one.

The next meeting of the society will be held February 14 at 1 45 p m at the home of Mrs. Herbert Mowery, Oxford RD.

Murry Heads Auctioneers

Elmer Murry, Lititz, was elected vice president of the Pennsylvania Auctioneers Association at the annual meeting held in Harrisburg last Friday and Saturday. Murry also is vice president of the Southeastern Pennsylvania Association.

Russell Kehr, Hanover, was elected president, and Kenyon Brown, Doylestown, secretary-treasurer. Mrs. Ruth Ellwein, supervisor of the license law of Pennsylvania, was the speaker.

The Reverend Mr Singer is married to the former Phyllis Schwartz, Gettysburg The couple have one daughter, Deborah

The program will include the treasurers report for the year and announcement of the new directors of the association.

Key to quality nursery trees is a vigorous root system Trees planted in cans or balled in burlap have a better chance at survival than those sold with bare roots.

New Equipment Is Installed By Egg Co-op

Installation of the latest word in egg processing equipment began this week at the Producers Cooperative Exchange, Coatesville.

Features of the automatic egg handling system include automatic sizing Each egg is weighed within a fraction of a second to a tolerance of 1/50th of an ounce.

Other features are automatic blood spot detector, which picks out and packs blood spots in white and brown shell eggs, and in-plant washing and drying This last feature can save many hours of the poultrymen's time by relieving him of the task of washing his eggs at the farm level, and assuring Mrs. Housewife of a clean, good quality egg.

Equipment is expected to be in full operation by February first. The Cooperative leases the equipment from Food Machinery Corporation.

BEST FOOD BUYS

Flexible Shopping List Valuable

A flexible shopping list and careful buying will help keep the food budget balanced this week-end, declares Tom Piper, Penn State Extension Marketing Agent Weather conditions at this season of the year exert considerable influence on harvesting operations and delivery schedules Temporary shortages can cause unexpected price variations

Best food values are expected at the meat counter this week-end as pork loins and roasts, chicken, ribs of beef and steak via for promotional emphasis in local food markets.

Large sized eggs, dairy products and a variety of seafood items are in plentiful supply. These items are rich in food value and offer definite economy on a cost per serving basis.

The prevailing dockworker's strike has forced most banana houses to close down for lack of supplies. This explains the steady climb of prices to new highs in recent weeks, a condition true of most imported fresh fruits and vegetables.

Florida citrus shipments will probably show a slow increase until such time as size and condition of remaining fruit is established. One local wholesaler estimates that good fruit suitable for fresh market will not be over ten to fifteen percent of the original crop Prices of oranges and orange products have advanced sharply since the freeze.

Best buys in fresh fruit will be found among several varieties of apples suitable for eating fresh or for cooking. Western pears, Emporer grapes and avacados are reasonably priced Thanks to last year's bumper crop, red tart cherries are in plentiful supply and an economical choice for that special pie or fancy dessert.

Supplies of tender vegetables have been substantially reduced by last month's Florida freeze. Prices have advanced on many items and for the most part they are higher than a year ago. Best buys at this time include mushrooms, Romaine lettuce, white potatoes onions, sweet potatoes, carrots and bunched green onions. Lettuce prices are practically the same as a year ago. Most of the lettuce is from Western areas not seriously affected by the cold.

Grocery Stores Stock Food For 15 Days

Retail food stores have a 15½ days' supply of foods on hand for each person in the continental United States, according to a report issued today by the U S Department of Agriculture.

The Department's Economic Research Service made the revised estimates at the request of the Office of Civil Defense on the basis of 2,000 calories of food and 32 ounces of nonconcentrated liquids per person per day. These specifications are believed to be more realistic short-term levels of food and beverage consumption in an emergency than the previous basis of 3,000 calories and 56 ounces of fluids

Caloric value of canned and bottled liquids is included in the food inventories Fluids include beverages that can be substituted for drinking water such as milk, soft drinks, juice, beer, and wine

Slightly more than four-fifths of the food supply at retail can be stored for relatively long periods without special handling. These foods consist of canned, bottled, dried, and packaged products. The remaining fifth of the retail supply is in fresh and frozen form

The manufacturer's brand helps to identify a product, says Harod Neigh, Penn State extension specialist in consumer economics The brand name serves as a guide to future buying if the consumer likes the item. The manufacturer is responsible for seeing that his product remains uniform.

John Deere 1010 Special Row-Crop Utility Tractor

You Saw It At The Farm Show!

John Deere has a powerful new contender in the compact tractor field, at an extra-low price. It's worth seeing — worth driving — just to convince yourself that you can get all the plus values and quality of New Generation earning power at such a low investment.

Your John Deere dealer is ready to demonstrate this new 36 horsepower Ten-Ten Special Row-Crop Utility. Stop in. Check on its many features — live hydraulic system, 3-point hitch with Load-and-Depth Control, 540 rpm PTO outlet. Check on its power and weight — ample for heavy lugging jobs. See how easily it handles dozens of tools, old and new — including loaders. Drive it yourself. For sure, check on the economy tag that puts such versatile earning power and quality into the low-price field. Stop in at your local dealer. Ask for a free demonstration. Remember — you can buy this new Special with the convenient John Deere Credit Plan, at any of the following dealers.

Farm Women Elect Officers

Mrs Abner Risser, Bainbridge R1, was reelected treasurer of the Society of Farm Women of Pennsylvania at the group's annual meeting in conjunction with the state Farm Show this week in Harrisburg

The newly elected president of the state organization is Mrs Leroy Bruce, Kennett Square, Chester County.

Among resolutions the Society adopted were That members have a family alter and attend the church of their choice regularly, more junior colleges to help many more students of promising ability to continue their education heavier penalties for driving while under the influence of alcohol, removal of junk car lots from along highways — they are "eyesores" to the State's natural beauty, and that spray material, used to control weed and shubbery growth along the highways, be applied with extreme care to save wild flowers, and that the growth killed by spraying be removed'

Farm Women Appoint Sec.

Mrs Robert Russell was appointed corresponding secretary of Society of Farm Women No 1 at the meeting held on Saturday afternoon at the home of Mrs Clayton Rover, Ephrata, with Mrs Margaret Hopkins, co-hostess Mrs Russell replaces Mr Russell Schreiber who resigned

Mrs Abram Bollinger, the president, Mrs. Benjamin Sheaffer and Mrs Ira Shearer were appointed delegates to attend the State Convention being held at Harrisburg this week

Six members received gifts for perfect attendance records this year, they were, Mrs C V Smith, Mrs Neil Clark, Mrs Martin Moore, Mrs. W Dean Fyock, Mrs Raymond Newcomer and Mrs Daniel Brubaker Mrs Fyock, the retiring president, was presented with a past president's gift

The next meeting will be held at the home of Mrs. James Roth February 2nd when Tom Dugba, an African Student at Millersville Teachers College, will be the speaker.

Square Dancers Bring Ribbons To County

Two Lancaster County square dance teams won ribbons Tuesday night in the rural talent contest at the Pennsylvania Farm Show in Harrisburg

Winning a blue ribbon in the Folk Dance Festival and Contest were the Alamande Hall Dance Group, Marietta R1, coached by William S. Endslow

In the red ribbon group were the dancers from the Lancaster County Senior Extension club, coached by Roger Thome, Mount Joy R2.

Solanco FFA Essay Contest Features Trucks

Ten members of the junior vocational agriculture class at Solanco High School, Quarryville, have submitted essays in the annual truck and essay contest

The theme of the contest this year will be "The use of the Motor Truck by the Southern Lancaster County Farmer."

The contest is sponsored jointly by Herr's Motor Express Inc, Quarryville, and B S. Wartel & Sons, Drumore.

The entries will be judged by the Solanco Junior-Senior High English department for content and composition and then the final judging will be done by Robert Phillips, editor of the Quarryville Sun, Abner Musser, retired merchant from the Buck, the Rev George E Herbert, pastor of the Quarryville United Church of Christ

The prizes are a feeding steer not to exceed $150 donated by Herr's Motor's Express, Inc as first prize Second prize will be $75 to be used for a farm project of the winner's choice donated by B S Warfel & Sons. The steer will be supplied by the Shady Brook Farm The winning prizes must be exhibited at the Solanco Fair of 1963 as a requirement of the contest.

The winners will be announced and prizes awarded at the annual FFA banquet on March 7 at 7 p m in the Solanco Junior High School.

DO YOU KNOW HOW MUCH MILK YOUR COWS CAN REALLY GIVE?
A cow is a factory. She eats grass, hay, silage, grain and Wayne Feeds. She makes milk. Each cow-factory has a certain bred-in capacity. When Bossy's assembly line isn't running at full capacity, she isn't making as much money for you as she should. ■ The way to find out if she's really running at full capacity is to put more feed in and see if you get more milk out. FEED HER ACCORDING TO WHAT SHE COULD GIVE TOMORROW, instead of what she gave yesterday. ■ Wayne can show you how to balance these larger feed intakes so that your cows can handle them. You feed the rumen bacteria too, so they can work harder and digest more roughage. ■ See us now for the Wayne Program that will work for you . . . choose from these quality Wayne Feeds . . . Strawberries May be Planted In May If Stored Properly

Strawberry growers who use cold-stored plants may be able to reduce first-year production costs by delaying the planting date two to three months, the U S. Department of Agriculture reports

In tests at Beltsville, Md, less labor was required for weed control and removal of excess runner plants in plots set in June than in plots set April or May. The research workers found no significant differences in yield, fruit size, amount of fruit decay, or crown size of strawberries planted in April, May, or June. Growers normally plant no later than April.

June planting is made by a handling and storing method in which dormant plants are dug in winter months, bundled in crates lined with polyethylene, and stored at 30° F This method was developed in previous USDA research by horticulturist John T. Worthington, of the Agricultural Marketing Service, and Dr Donald H. Scott, horticulturist of the Agricultural Research Service.

Strawberry plants handled this way retain their bright green foliage and vigorous roots for as long as 10 months in cold storage. Cold-stored plants are available from many east coast nurserymen.

Before a method was developed for storing plants in good condition over a period of many months, setting in March or April was recommended Most east coast strawberry growers still plant this early, even if they use cold-stored, polyethylene-packaged plants.

In the date-of-setting tests, Mr Worthington and Dr Scott used plants of four varieties — Surecrop, Pocahontas, Sparkle, and Blakemore Matted strawberry beds were kept to a uniform width of two feet by periodic removal of excess runners. On the plots set in April, excess runners were removed four times between August and October On the May-set plots, runners were clipped three times between September and October On the June-set plots, a few runners were removed once, in October By the end of the growing season, plant density was the same on all plots, regardless of when they were planted.

Irrigation was necessary to give the June-set plants a good start But the need for irrigation is not necessarily limited to June planting. In many cases, the researchers point out, irrigation is desirable throughout the growing season, regardless of the planting time.

CHAMPION SHORTHORN OF THE 4-H steer competition at the Pennsylvania Farm Show on Thursday was shown by Donna Hess, the 11-year-old daughter of Mr and Mrs. Elvin Hess, Jr., Strasburg R1. Donna duplicated the feat she accomplished at the Pennsylvania Livestock Exposition in November.

Refreshments by Society of Farm Women No. 1.

COWS PROPERLY CONDITIONED ...during the dry period PRODUCE UP TO 25% MORE MILK!

BEFORE CALVING This cow was fitted on the Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

AFTER COMPLETING RECORD The same cow after having produced 23,044 lbs. of milk and 941 lbs. of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 11½ tons of milk!

600 pounds of PIONEER DRY and FRESHENING yields an extra TON OF MILK!

Proper feeding of the dry cow is the most important single factor affecting herd health, longevity, and a sustained high level of milk production. In 60 days, while the cow is dry, Pioneer Dry and Freshening feed will repair the body from the previous lactation, build a reserve of body condition for the next lactation, and develop a stronger calf. In addition your cows will have less calving difficulties, eliminate placenta quickly, have less udder congestion, and *most importantly they will produce up to* 25% more milk!

See us today for full particulars.

LEOLA — QUARRYVILLE

State FHA Awards Honor To Musselman

A Lancaster County man was honored this week by the Pennsylvania Association of Future Homemakers of America at their annual convention in conjunction with the Farm Show in Harrisburg.

Stanley Musselman, director of personnel and community

STANLEY MUSSELMAN

relations for the Lancaster County National Bank, was given honorary membership in the organization in recognition of his activities toward the advancement of the statewide organization.

Musselman is chairman of the rural youth committee for the County Bankers Association. He is a former teacher of vocational agriculture and through his efforts the county association has given "unusual recognition to the FHA program".

Since 1949 a total of 135 adults have been granted honorary membership in the state FHA, 25 of them being men.

● Young Farmers

(Continued from Page 1)

any farmer willing to learn."

Two of the meetings, which are open to any interested farmer, will be held on Tuesday night, January 15.

Beginning at 7:30 p.m. the New Holland chapter will meet in the Garden Spot High School agriculture room with R Gene Daugherty in charge Results of the chapter's corn growing contest will be discussed by a panel of members giving their cultural practices. Awards for high production will be given by business firms in the New Holland area.

At 8 p.m the Manor chapter will meet in the Penn Manor High School agriculture room with Howard Siglin in charge Mr. A Robert Carlson, extension agriculture engineer from the Pennsylvania State University will discuss building, remodeling, and construction of farm buildings

On Thursday, January 17, Joseph McGahen, teacher of vocational agriculture at Manheim Central High School will conduct the meeting in the high school agriculture room The subject for discussion will be farm machinery adjustment and lubrication.

● Tractor Club

(Continued from Page 1)

areas where the clubs are to be organized

The first of the two organizational meetings will be held at 7:30 p m on January 14 at the Alan H. Matz Implement Company, Denver. This club will be known as the Northeast Area club.

On the following night at the same hour, the Central area club will be organized at the Landis Brothers Farm Equipment Company on the Manheim Pike just outside Lancaster

The program will consist of eight meetings scheduled one evening each week

At present, Merriam said, no club is planned for the southern part of the county, but if sufficient interest is shown by members or anyone interested in being a leader, a club could be formed.

PUREBRED GUERNSEY SALE
Thursday, January 17, 1963, 12:30 Noon
At the Ass'n. Sales Pavilion, 6 miles E. of Lancaster, Pa., on Rt. 30.
61 HEAD - 1 BULL - 40 COWS AND 20 BRED HEIFERS
T.B. & Bang's Cert. Vacc.
Consignors realize that buyers are only interested in cows or bred heifers fresh or due soon after a sale. That isn't enough. They have to be good size, of pleasing type, with good records.
We are most fortunate to have a large lineup of that kind in this sale. It will give everybody an opportunity to strengthen their winter production, and we predict, at reasonable prices.
We appreciate the business we did with selling good Guernseys to our friends in 1962 and pledge to try to get the very best consignments for our sales in 1963. We feel sure that the first one this year fulfills this pledge.
SALE MANAGED BY:
THE PENNA. GUERNSEY BREEDERS' ASS'N.
P. O. BOX 458 CAMP HILL, PA.

Farm Prices Show Slight Improvement

Prices received by Pennsylvania farmers in December for their agricultural products were down slightly from a month earlier, but up nearly four per cent from the previous year, according to a report issued this week by the Pennsylvania Crop Reporting Service

The State Department of Agriculture agency attributed the slight decline to a seasonal drop in milk prices which more than offset the higher prices received for most meat animals and field crops

The index of prices received which is a measure of the trend and changes in prices received by farmers, was 233 percent of the (1910-14 equals 100) base This compared with 234 a month earlier and 225 a year earlier

Most meat animal prices advanced during the month with calf and lamb prices leading the advance by $ 90 and $ 80 per CWT respectively All meat animal prices were substantially above a year earlier

However, wholesale milk price, showing the usual seasonal decline was three per cent under the 1961 price Prices received for broilers and farm chickens during the month showed a decline from the previous month while turkey prices showed a two cent increase Egg prices remained steady

Prices received for food grains and hay showed increases during the month Partially offsetting these higher prices was a nickel decline in potato prices Prices received for all crops was substantially above the same period a year earlier

The Index of Prices Received by U S Farmers declined 1 percent during the month ended December 15 to 242 percent of its 1910-14 average Lower prices for oranges beef cattle hogs, lettuce, and wholesale milk were primarily responsible for the decrease during the month Partially offsetting were higher prices received for feed grain, especially corn The December index was 1 percent above a year earlier

With the Parity Index up and farm product prices off slightly, the Parity Ratio declined 1 point during the month to 79 ending the year at the same level as a year ago

---

Cardinal Rule

In using a dishwasher, the cardinal rule is to read and follow carefully the instructions that come with it, reminds Helen E Bell Penn state extension home management specialist Note the directions for using special cycles such as the one for pots and pans The dishwasher may look like one you've already used but it may be a new model requiring new methods

---

The world fish catch in 1961 totaled 41 2 million metric tons an increase of 8 per cent over 1960 according to the Food and Agricultural Organization.
